

Calendar Time Instructions

Days of the Week

Laminate the following paper strips: *Days of the Week*, *Yesterday was*; *Today is*; *Tomorrow is*; *Sunday*, *Monday*, *Tuesday*, *Wednesday*, *Thursday*, *Friday*, and *Saturday*. Place *of the Days Week* on the top of a board, wall, file folder, etc.). Underneath of *Days of the Week*, place the days of the week. Have a child place the strips: *Yesterday was*; *Today is*; *Tomorrow is* on the left of the correct day of the week. (You can place a strip of clear laminate paper underneath *Days of the Week* and for the *WEATHER*, on the right of *Today is*. You can laminate the entire file folder if you like.)

Weather

Cut out the words: *WEATHER* and *Today is*. (If you are using the black and white words, color them using colored pencils.) Laminate. Place a piece of tape next to *Today is* and place the laminated strips of paper for the type of weather it is outside. (For younger children, you can use words and pictures.)

Have a child look outside and check the weather. Have a child place the correct weather word strip next to *Today is*. underneath the *Days of the Week* (or somewhere else).

Calendar

Make a calendar out of a large poster board. For the days of the week, make seven columns and a row of rectangles. Type up the days of the week. Glue in each rectangle. Divide the poster board into seven columns and six rows. Laminate calendar pieces you have created or have found on the web.

Write or type up the year. Place it above, on the right side of the calendar.

Here are some sites that you can use:

Bry-Back Manor

<http://www.bry-backmanor.org/archive.html>

Preschool Express: Pattern Station by Jean Warren

http://www.preschoolexpress.com/pattern_station.shtml

Above the calendar, place the laminated months of the year. Place double sided sticky tape on each rectangle. Have a child place the correct calendar piece on the calendar.

Make a paper that has each weather description (and picture on it). Have a child place a mark by the correct word (picture). Graph it at the end of the month.

Days in School

Above each a cup (or holder), place the word strips (hundreds; tens; ones) and number (1 0 0). Have a child add a straw in the *ones* place. When you have been in school for ten days, have a child bundle them up and place them in the tens place. Keep adding them to the tens place. When you reach one hundred days, bundle all of them up and place them in the hundreds place.
